

Junior Software Developer (C#, NodeJS, PostgreSQL)

ZEEVES PTE. LTD

📍 **Russia, Yekaterinburg, Sverdlovsk region**

Required experience: self-made study or non-commercial projects. Would be a benefit if you have previously worked in IT as software developer or on another position.

Work time: approximately 5/2 with hybrid model: offline-online. Flexible work time is guaranteed!

Company Information

Zeeves is a Singapore-based company that develops the Zeeves product. This is a decentralised wallet based on the Zilliqa block-chain, released in the form of a Telegram bot. Zeeves allows you to store cryptocurrency, send it, and also make investments. Thanks to Zeeves, you can use DeFi on other platforms, for example ZilSwap.

Responsibilities

Programming 😊

Stack – C#, NodeJS, PostgreSQL, Docker, k8s. We have an intention to move all key services written in C# to Java. More details will be explained on an interview with a candidate.

Key skills

Programming in any object-oriented language. Also, would be great if you know SQL basics.

Additional skills

The level of knowledge of English B1 and higher.
